

[Insert title of invention]Interactively create uniquely Identified Tangible Print Advertising from Internet Web Pages

Abstract

The current invention is a method for bridging the gap between the virtual multimedia-based Internet world and the physical world of tangible object media, such as print advertising. More particularly, a method for multimedia-based Internet Advertisers to expand the promotion of their products and web pages by encouraging Affiliates to post uniquely identified printed versions of the virtual advertising to be posted or otherwise physically distributed in the tangible world.
